

**STATEMENT BY THE EURO-ATLANTIC SECURITY LEADERSHIP GROUP,
ASIA-PACIFIC LEADERSHIP NETWORK, EUROPEAN LEADERSHIP NETWORK,
GRANDVIEW INSTITUTION, AND NUCLEAR THREAT INITIATIVE**

Prepared for Presidents, Prime Ministers, Parliamentarians, and Publics

Support for Preventing the Accidental, Mistaken, or Unauthorized Use of a Nuclear Weapon: Nuclear “Fail-Safe”

Safeguards essential to preventing nuclear catastrophe for nearly eight decades are now being tested by disruptive technologies, heightened geopolitical tensions, and the erosion of arms control. The danger that a terrible decision may be made to use nuclear weapons in a moment of crisis is growing. The incorporation of artificial intelligence into attack warning systems, threat assessments, and decision-making processes could exacerbate the risk of nuclear use. Additionally, adversaries, including non-state actors, now possess the capability to launch cyberattacks that could disrupt nuclear command and control and early-warning systems. Every nation with nuclear arms bears responsibility for reducing the risk of unintended, mistaken, or unauthorized nuclear use. Such failures would have profound consequences for global security.

Informed by a series of senior dialogues with nuclear-armed states in 2024 and 2025,¹ we call on all countries that possess nuclear weapons to strengthen their safeguards to prevent unauthorized, inadvertent, or mistaken use of a nuclear weapon, including through accidental escalation or false warning of an attack. This process could include internal nuclear “fail-safe” reviews. Such strengthened national safeguards would be effective unilateral nuclear risk-reduction measures, not requiring any negotiation, treaty, or verification. They could also motivate and inform new dialogues on arms control, nuclear risk reduction, and confidence-building measures, which are a necessity as global nuclear forces and threats grow.

¹ “Global Nuclear Fail-Safe: Meeting Summaries and Related Documents,” August 13, 2025. Available at: <https://www.nti.org/analysis/articles/global-nuclear-fail-safe-meeting-summaries-and-related-documents/>.

Strengthened nuclear fail-safe measures are essential to maintaining strategic stability. Preventing accidental or mistaken nuclear use is also a moral imperative, directly linked to the protection of civilian populations.

Most immediately, the five nuclear-weapons states under the Nuclear Non-Proliferation Treaty (NPT) should consider making a Joint Statement in support of nuclear fail-safe connected to the NPT Review Conference beginning in April 2026, as a demonstration of their commitment to prevent the unauthorized or unintended use of nuclear weapons. Such a statement would reinforce the important January 2022 P5 declaration that a nuclear war cannot be won and must never be fought, and would help reduce the risks of miscalculation and escalation in an increasingly complex security environment. It should be welcomed by all non-nuclear weapons states.

All nuclear-armed states should take immediate action to prevent a possible catastrophe. The world cannot afford to wait for more peaceful times to reduce the risks of nuclear use.

Signatories

Co-Conveners

Des Browne

Vice Chair, Nuclear Threat Initiative; Chair of the Board of Trustees and Directors of the European Leadership Network; and former Secretary of State for Defence, United Kingdom

Ambassador (Botschafter a.D.)**Wolfgang Ischinger**

President, Munich Security Conference Foundation Council, Germany

Ernest J. Moniz

Co-Chair, Nuclear Threat Initiative; and former U.S. Secretary of Energy, United States

Sam Nunn

Founding Co-Chair, Nuclear Threat Initiative; and former U.S. Senator, United States

Christine E. Wormuth

President and CEO, Nuclear Threat Initiative; and former U.S. Secretary of the Army, United States

Participants

Ambassador Nobuyasu Abe

Former United Nations Under-Secretary-General for Disarmament Affairs, Japan

James Acton

Co-Director, Nuclear Policy Program; and Jessica T. Matthews Chair, Carnegie Endowment for International Peace, United States

Ambassador (Ret.) Brooke D. Anderson

Former Chief of Staff and Counselor, White House National Security Council, United States

Steve Andreasen

National Security Consultant, Nuclear Threat Initiative; and former Director for Defense Policy and Arms Control, White House National Security Council, United States

Professor Dewi Fortuna Anwar

Research Professor at the Research Center for Politics, National Research and Innovation Agency; and former Deputy Secretary for Political Affairs to the Vice President, Indonesia

Joel Bell

Chairman, Chumir Foundation for Ethics in Leadership, Canada

Julia Berghofer

Senior Policy Fellow, European Leadership Network, Germany

Kathryne Bomberger

Director-General, International Commission on Missing Persons, United States

Philip Mark Breedlove

General (Ret.), U.S. Air Force; former Commander, U.S. European Command; and 17th Supreme Allied Commander Europe of NATO, United States

Richard Burt

Managing Partner, McLarty Associates, United States

Participants (continued)

General (Ret.) Vincenzo Camporini

Vice President, Istituto Affari Internazionali, Italy

Oleksandr Chalyi

Former First Deputy Minister of Foreign Affairs of Ukraine; former Foreign Policy Advisor to the President of Ukraine; and Associate Fellow, Geneva Centre for Security Policy, Ukraine

Ambassador (Ret.) Alper Coşkun

Senior Fellow, Carnegie Endowment for International Peace, Türkiye

James Cowan

CEO, HALO Trust, United Kingdom

Charles B. Curtis

Founding President Emeritus, Nuclear Threat Initiative, United States

Paul Dean

Vice President for Global Nuclear Policy, Nuclear Threat Initiative, United States
